

JOHN FLORIEL ISIDRO

Bataan, Philippines | +63 962 624 4904 | johnflorielisidro@gmail.com | linkedin.com/in/johnflorielisidro

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer and Engineering Team Lead with extensive professional experience designing, building, and scaling enterprise-grade web applications, distributed backend microservices, and robust cloud infrastructure. Expertise spans the full software development lifecycle, with a proven track record in modern JavaScript and TypeScript ecosystems (Node.js, NestJS, React, Next.js). Acknowledged for strong leadership skills in mentoring engineering teams, managing continuous deployment (CI/CD) pipelines, and collaborating closely with stakeholders to align sophisticated software solutions with strategic business goals.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, HTML5, CSS3
- **Backend Architecture:** NestJS, Node.js, Express, Fastify, RESTful APIs, GraphQL, WebSockets (Socket.IO)
- **Frontend Frameworks:** React, Next.js, Angular, Vue.js, Tailwind CSS
- **Databases & Caching:** PostgreSQL, MySQL, MSSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, Lightsail), Docker, Kubernetes, Terraform, Jenkins, Nginx, Cloudflare, Firebase, Azure, GCP
- **Messaging & Event-Driven:** Kafka, RabbitMQ, Event-Driven Architectures
- **Security & Auth:** OAuth2, OpenID Connect, JWT Authentication, OWASP Security Testing
- **Tools & Testing:** Git, Postman, Swagger, Rapidoc, Sourcetree, Jest, Mocha

PROFESSIONAL EXPERIENCE

Senior Software Engineer | MADLABS

Remote / Manila • February 2022 – Present

- Lead a high-performing software engineering team responsible for building and architecting highly scalable web applications and enterprise backend systems.
- Designed and implemented robust microservice-based architectures using NestJS and Node.js, significantly boosting system modularity and maintainability.
- Developed enterprise-grade RESTful and GraphQL APIs supporting high-volume, mission-critical business operations.
- Managed end-to-end cloud infrastructure deployments and automation workflows using AWS, Docker, and customized CI/CD pipelines.
- Conducted rigorous code reviews, instituted rigorous engineering standards, and established company-wide development best practices.

- Collaborated closely with cross-functional stakeholders to align architectural decisions with overarching business requirements.
- Mentored junior and mid-level developers, fostering a culture of continuous learning and improving overall team delivery productivity.

Team Lead / Senior Software Engineer | TAS TRADESOFT

Remote / Negros Occidental • February 2020 – February 2022

- Led agile engineering teams in designing and launching business-critical enterprise software solutions.
- Engineered backend services and scalable APIs using Node.js, Express, and TypeScript to support intensive data workflows.
- Oversaw software architecture planning, technical roadmapping, and full software development lifecycle (SDLC) execution.
- Optimized deployment automation, cloud infrastructure reliability, and application performance, decreasing system latency.
- Coordinated sprint planning sessions, facilitated daily stand-ups, managed technical decision-making, and ensured timely project delivery.

Full Stack Developer | DUNBRAE SUBIC, INC

Subic Bay Freeport Zone • April 2019 – February 2020

- Developed internal operational systems and customer-facing web platforms utilizing modern JavaScript/TypeScript libraries.
- Built production-ready backend APIs and interactive frontend views supporting multifaceted operational workflows.
- Designed, indexed, and optimized relational database structures (PostgreSQL/MySQL) to maximize application processing speeds.
- Partnered with internal departments to clarify requirements and deliver critical software solutions on schedule.

Quality Assurance Engineer / Full Stack Developer | STRATEGY LIONS

Remote / Australia • August 2018 – April 2019

- Executed thorough software quality assurance testing, test plan formulation, and validation for major production releases.
- Investigated complex software defects, documented root-cause issues, and coordinated with development teams for prompt technical resolution.
- Developed full-stack features and bug-fixes for internal and client-facing business applications.
- Collaborated closely with senior architects to continuously enhance software reliability and overall product excellence.

Team Lead / Full Stack Developer | LAGILITY

Pampanga, Philippines • April 2017 – August 2018

- Spearheaded a software development team focused on building and maintaining comprehensive full-stack web applications.

- Managed daily task delegation, sprint planning, feature scoping, and overall project delivery timelines.
- Developed responsive frontend user interfaces and structured backend APIs across multiple concurrent client projects.

KEY ENGINEERING ACHIEVEMENTS

- Architected, structured, and deployed scalable microservices infrastructure for enterprise software platforms, migrating legacy monolithic frameworks to highly decoupled service-oriented environments.
- Optimized large-scale system performance and data management by tuning multi-tenant database clusters (PostgreSQL/MySQL) and implementing high-efficiency Redis caching layers.
- Spearheaded the integration of cloud automation pipelines using Terraform, Docker, and Kubernetes, orchestrating seamless containerized deployments across AWS infrastructure.
- Designed and maintained low-latency distributed communication tiers leveraging event-driven messaging networks like Kafka, RabbitMQ, and real-time WebSockets (Socket.IO).
- Established robust enterprise security controls by designing authorization layers using OAuth2, OpenID Connect, and JWT standards while conducting systematic OWASP security compliance audits.
- Engineered flexible, high-volume enterprise API ecosystems utilizing an advanced blend of RESTful interfaces and complex GraphQL data federation strategies.

EDUCATION

Bachelor of Science in Computer Science

Microcity College of Business and Technology
